KNIFEdock™

Safely stores, organizes and protects your fine knives.

The KNIFEdock™ allows knives to be neatly stored in drawers, freeing up valuable countertop space for more productive uses. The patent pending StabSlab™ technology makes us different.

The StabSlab™ is composed of layers of a cork rubber compound that allows knives to slide into the slab and store without touching another blade, in a smaller amount of space than any other knife storage system.

Item #04497

KNIFEdock™

Of course, it keeps all the blades away from inadvertent skin contact, preventing the consumer from cutting themselves while reaching for the right knife. It allows for easy visual identification of a knife, as opposed to traditional knife blocks, which only let you see the handle.

Item #04499

KNIFEdock™ DELUXE

Made from 100% sustainable Bamboo

KNIFEdock™

Safely stores, organizes and protects your knives!

- Super strong magnets embedded within the wood so blades only make contact with wood, not metal
- Eliminates the typical knife block slots that dull knife blades and provide a safe haven for bacteria
- Perfect for mixing and matching various sets of knives since there are no pre-sized slots
- Showcases the blade for easy identification, grab the correct blade for the specific task every time
